Education

MVJ College Of Engineering *Exp. May 2026*
B.E in Computer Science **CGPA: 7.8/10**
BD Evening College — 12th *Mar 2022*
PCM (Physics, Chemistry, Math) **70%**
Himalayan International School — 10th *Apr 2020*
61%

EXPERIENCES

- **Full Stack Developer Intern** Ongoing
  Chiac ASI (A Super Aligned Super Intelligence Venture)
  - Built a Research Summarization Engine leveraging Gemini 1.5 Pro (LLM) to extract structured insights (abstract, methods, results) from research papers.
  - Implemented prompt-based text processing to convert unstructured content into concise, readable summaries
  - Developed a frontend prototype of a Course Management System with role-based UI flows and instructor/student dashboards.
  - Implemented course creation and management interfaces using Next.js, React, TypeScript, and Tailwind CSS.

- **Full Stack Developer** (Nov 2025- Mar 2026)
  Codec Technologies
  - Developed a portfolio website and a real-time weather application.
  - Integrated RESTful API (OpenWeather) with asynchronous data handling and error management.

PROJECTS

- **AI-Powered Antivirus Dashboard** **(Major Project)**
  (Next.js 16, React 19, FastAPI, WebSockets, SQLModel)
  - A simulation-based, full-stack antivirus dashboard modeling enterprise threat detection, sandbox analysis, application-level quarantine, and real-time SIEM monitoring.
  - Enabled real-time security monitoring and alert updates using FastAPI APIs and WebSocket communication.
  - Visualized system health and threat activity through interactive dashboard components and status indicators.

- **Reels App–Short Video Streaming Platform**
  (Flutter, Dart, Riverpod, Video Player, Chewie, Pixels API)
  - A Flutter-based short video streaming application featuring category-based feeds, optimized playback, and real- time content integration.
  - Integrated dynamic content loading and efficient state management using Riverpod and external API services.
  - Optimized video playback performance and UI responsiveness for seamless scrolling and viewing experience.

- **QuizFlow — Quiz Application**
  (Flutter, Dart, FastAPI, REST APIs, SharedPreferences, Android)
  - Developed a Flutter quiz app with dynamic question selection, onboarding logic, and real-time quiz data fetched via the StackExchange API.
  - Built a Flutter quiz app using live StackExchange API data with configurable quiz behavior.

TECHNICAL SKILLS

- **Languages:** Dart, Python, SQL, DBMS, basics of AI/ML
- **Frameworks & Libraries:** Flutter, Next.js, React, FastAPI, Riverpod
- **Version Control & Tools:** Git, GitHub, VS Code, Android Studio
- **Development Focus:** Mobile App Development, Full-Stack Web Development, UI/UX Implementation, Real-Time Systems
