SUMMARY

Final-year Computer Science engineer (CGPA 7.5) with hands-on experience building full-stack web applications, cross-platform mobile apps (Flutter), and AI-integrated systems. Proficient in React, Next.js, FastAPI, and real-time architectures (WebSockets). Passionate about solving engineering problems at the intersection of mobile, web, and applied AI.

EXPERIENCE

Full-Stack Developer Intern | *Chiac ASI — Super Aligned Super Intelligence Venture* Feb 2026 – May 2026

- Architected a multi-agent AI research pipeline using Planner, Researcher, and Analyst agents with local LLM inference via Ollama, automating end-to-end topic analysis and structured insight generation.
- Engineered a Research Summarization Engine powered by Gemini 1.5 Pro, extracting structured outputs (abstract, methodology, results) from academic papers to accelerate research workflows.

Full-Stack Developer | *Codec Technologies* Nov 2025 – Mar 2026

- Built a real-time weather application consuming live REST APIs, delivering location-aware forecasts through a fully responsive React-based UI with error handling and loading states.
- Designed and deployed a personal portfolio website with modern UI/UX principles, showcasing projects, certifications, and technical profile to professional audiences.

PROJECTS

AI-Powered Antivirus Dashboard — *Next.js 16, React 19, FastAPI, WebSockets, SQLAlchemy* (Major Project)

- Developed a full-stack security monitoring platform featuring real-time threat detection, sandbox analysis, and SIEM-style event tracking using live system telemetry.
- Implemented WebSocket-based bidirectional communication with FastAPI for continuous threat streaming, enabling sub-second alert delivery and interactive threat visualization.
- Built modular dashboard components to visualize system health, active threat indicators, and security event timelines, improving SOC operational efficiency and situational awareness.

Reels — Short Video Streaming Platform — *Flutter, Dart, Riverpod, Video Player, Chewie, Pixels API*

- Engineered a Flutter-based short-video application with category-based feeds, optimized video playback, and real-time content integration via external media APIs.
- Implemented scalable state management using Riverpod for reactive UI updates; optimized lazy loading and scroll performance for seamless high-throughput video consumption.

QuizFlow — Dynamic Quiz Application — *Flutter, Dart, FastAPI, StackExchange REST API, SharedPreferences*

- Built a cross-platform quiz app consuming the live StackExchange API with configurable quiz logic, dynamic question selection, onboarding flow, and persistent session management via SharedPreferences.
- Designed a FastAPI backend layer for custom question routing and response validation, decoupling business logic from the Flutter client.

TECHNICAL SKILLS

Languages: Python, Dart, SQL, JavaScript / TypeScript

Frameworks & Libs: Flutter, Next.js, React, FastAPI, Riverpod, WebSockets, SQLAlchemy

AI / LLM: Ollama (local LLM inference), Gemini API, multi-agent system design

Tools & Platforms: Git, GitHub, VS Code, Android Studio, Google Cloud Platform (GCP)

Focus Areas: Mobile App Dev (Android/Flutter), Full-Stack Web, Real-Time Systems, REST API Integration

EDUCATION

MVJ College of Engineering

B.E. in Computer Science Engineering

2022 - 2026

CGPA: 7.5 / 10

BD Evening College

12th — PCM (Physics, Chemistry, Math)

Mar 2022

70%

Himalayan International School

10th — CBSE

Apr 2020

61%

CERTIFICATIONS

- Google Data Analytics Professional Certificate — Coursera
- Google Cloud Skills Boost — 27 Hands-On Cloud Skill Badges Earned
- LinkedIn Learning: App Development with the MERN Stack

In Progress
